

EU FUNDING: INDUSTRY 4.0

8th October, 2019

10:00-12:00

Hall S2, Pavilion E, Trade Fairs and Exhibitions Centre Brno

Innovative companies that need to finance the commercialization of innovation can apply for calls under the European Horizon 2020 programme, especially from the ECSEL Joint Undertaking. Focused on public-private partnerships for electronic components and systems, ECSEL offers innovators financial support for R&D and innovation projects.

The seminar participants will learn how to take part in the calls for proposals of the ECSEL Joint Undertaking, which has been operational since 2014 and supports projects focusing on mobility, health, energy, IT security, industry digitization, connectivity and interoperability or 5G, systems and components or process technologies, equipment and materials in electrical engineering. ECSEL's calls are addressed to SMEs, but also to large companies and research and technology organizations. The seminar aims to acquaint participants with how they can reach ECSEL support.

- 10:00** Introduction: Zdeněk ČECH, Deputy Head and Economic Advisor, European Commission Representation in the Czech Republic
